

COMPANY OVERVIEW

ABOUT US

Aqua Fix Ship & Boats Spare Parts Trading LLC is a UAE-based supplier of piping systems, valves, fittings, drainage solutions and marine spare parts, serving the marine, offshore, hospitality, healthcare, commercial and industrial sectors.

Our product portfolio includes PVC, CPVC, PPR, PB, stainless steel, carbon steel, copper and advanced thermoplastic piping systems, together with industrial valves, flow-control solutions and a comprehensive range of marine accessories sourced from trusted manufacturers.

We provide complete piping solutions for new construction, retrofit and maintenance projects. From piping systems and valves to drainage and specialized fluid handling solutions, we help customers source the right products through a single, dependable supply partner.

Working closely with contractors, shipyards, engineering consultants, facility managers and procurement teams, we deliver practical solutions that meet technical specifications, project timelines and operational requirements.

CORE VALUES

Our core values define who we are and guide everything we do. They reflect our commitment to quality, reliability, expertise and the relationships we build.

QUALITY

We are committed to supplying products that meet recognized international quality and performance standards.

RELIABILITY

We deliver dependable products and services that our customers can rely on with confidence.

TECHNICAL EXCELLENCE

We combine product knowledge and practical expertise to support informed engineering decisions.

INTEGRITY

We build lasting relationships through honesty, transparency and accountability.

CUSTOMER COMMITMENT

We are dedicated to responsive service, dependable delivery and long-term customer success.

“Quality in every product.

Reliability in every delivery.

Trust in every relationship.”

ENGINEERING SERVICES & SOLUTIONS

Aqua Fix provides more than product supply, offering project surveying, technical estimation, and Bill of Quantities (BOQ) preparation to support clients from project planning through execution. We focus on adding value by combining quality products, innovative technologies, practical engineering solutions, and efficient systems tailored to the specific requirements of each project.

Our experienced and dedicated workforce is one of our greatest strengths. Through continuous technical training, knowledge sharing, and professional development, we ensure our team remains equipped to meet evolving industry requirements. Whatever your project needs,

Aqua Fix is committed to delivering reliable solutions on time, within budget, and to the highest standards of quality, safety, and performance.

One catalogue, every material for marine, industrial and commercial projects.

Expertise Across Diverse Industries

Our Mission

To provide dependable piping, valve and engineering supply solutions through quality products, technical expertise and responsive service, enabling our customers to build, operate and maintain safe, efficient and sustainable systems with confidence.

Our Vision

To become the preferred engineering supply partner across the region, recognized for product reliability, technical excellence and customer trust, while supporting the industries that build, power and connect the future.

Quality & International Certifications

Aqua Fix maintains strong relationships with reputable international manufacturers whose products are recognized for their exceptional durability, flexibility, and superior resistance to corrosion and chemical exposure. This enables us to provide reliable quality that meets the highest and most demanding industry requirements. Our product portfolio includes solutions supported by independent third-party certifications from internationally recognized organizations such as ABS, DNV, RINA, BV, WRAS, KIWA, DVGW, FM, NSF, and other leading certification bodies.

What We Supply

PVC-U Pipes & Fittings

Cost-effective thermoplastic piping system for water distribution and industrial services. Lightweight, corrosion-resistant and easy to install with long service life.

Available from **16 mm to 250 mm** (Metric) and **½" to 24"** (ASTM SCH 40/80).

Supplied with a complete range of fittings and valves.

PVC-C Pipes & Fittings

High-temperature thermoplastic piping system with excellent chemical and corrosion resistance.

Suitable for hot water, chemical processing and industrial plumbing applications.

Available from **16 mm to 225 mm** (Metric) and **½" to 24"** (ASTM SCH 40/80).

Complete range of pipes, fittings and valves available.

Polybutylene (PB) Pipes & Fittings

Flexible piping system for hot, cold and chilled water applications. Offers fast installation, reduced noise and excellent corrosion resistance.

Available from 15 mm to 125 mm with push-fit and fusion joining options.

Ideal for residential, commercial and hospitality projects.

PPR & PPR-CT Pipes & Fittings

Reliable thermoplastic piping systems for hot and cold-water distribution. Corrosion-free, hygienic and maintenance-free with excellent thermal performance.

Available from 20 mm to 250 mm in pipes, fittings and valves.

Suitable for residential, commercial, marine and industrial applications.

Stainless Steel Press Fittings & Pipe Systems

Premium SS304 & SS316L press fitting systems for reliable, leak-free piping solutions.
Suitable for potable water, chilled water, compressed air and HVAC applications.
Available from 15 mm to 168.3 mm with a complete range of pipes, fittings and valves.
Ideal for marine, commercial, healthcare and industrial projects.

Copper & Bronze Press Fittings & Pipe Systems

High-performance copper and bronze press fittings for water, gas, cooling and compressed air systems.
Designed for quick installation, durability and long service life.
Available from 12 mm to 168.3 mm with a full range of fittings and accessories.
Widely used in marine, hotels, hospitals and commercial buildings.

HDPE Neutralization Tanks

Chemical-resistant HDPE neutralization tanks for laboratory and wastewater applications.

Designed for safe acid waste treatment with durable, maintenance-free construction.

Available from **5 to 2000 gallons** with various inlet, outlet and lid configurations.

Suitable for hospitals, laboratories and industrial facilities.

Industrial Valves, Strainers & Flow Control

Complete range of thermoplastic and metal valves for industrial, marine and building services. Includes ball, butterfly, check, globe, diaphragm, wafer, strainer and 3-way valves.

Available in **PVC-U, PVC-C, PP, PVDF, Stainless Steel, Cast Iron and Carbon Steel** in DIN and ASTM standards.

Suitable for water, chemicals, compressed air and process applications.

Double Containment Pipe Systems

Layered PVC, CPVC, and stainless-steel piping for transporting chemicals, compressed air, acid, and gas with a built-in secondary safety barrier.

Carbon Steel Press Fittings

Press-jointed carbon steel components for heating circuits and cooling water networks in industrial settings.

Acid Waste & PVDF Systems

Electrofusion and butt-fusion piping designed to hold up against aggressive chemicals — a fit for hospital labs and process plants alike.
